## WORK EXPERIENCE

**SFM Technologies (Tunis) | Feb 2026 – July 2026**

**Cybersecurity Engineer | SIEM • AI • Threat Detection**

- Designed and developed an AI integration system within a SIEM to enhance advanced cyber threat detection (APT threats, zero-day attacks).
- Collected, normalized, and analyzed security logs from multiple sources (firewalls, IDS/IPS, servers) to identify suspicious behavior.
- Implemented machine learning models (anomaly detection, classification) to automate incident identification and reduce false positives.
- Designed advanced detection scenarios and improved monitoring and incident response processes (SOAR).
- Authored technical project documentation and presented findings to the security team.

**Special Criminal Court of Bangui | July 2024 – Sept 2024**

**IT Support & Infrastructure Technician**

- Full management of IT assets: inventory, preventive, and corrective maintenance of equipment (PCs, printers, network peripherals).
- Provided direct technical support to users: incident resolution, Windows workstation configuration, and software installation.
- Actively supported network infrastructure: cabling, configuration of switches and routers, and monitoring network connectivity.
- Participated in implementing backup and security procedures for sensitive institutional data.
- Drafted incident reports and documented technical interventions.

**Orange Central Africa | July 2023 – Oct 2023**

**Network & Telecommunications Technician**

- Configured, deployed, and tested GREENTECH repeaters to extend mobile network coverage in underserved areas.
- Analyzed and diagnosed connectivity issues on telecommunication equipment (antennas, repeaters, microwave links).
- Participated in signal quality measurement campaigns and compiled technical analysis reports.
- Developed a rigorous methodology for network analysis and telecommunication protocols in a professional setting.

**Bank of Central African States (BEAC) - Bangui |  
March 2023 – Apr 2023**

**IT Support Technician – Banking Infrastructure**

- Provided technical support to end-users in a secure banking environment (incident resolution, helpdesk support).
- Analyzed BEAC's network architecture: topology, VLAN segmentation, and security protocols.
- Introduced to microwave links used for secure interconnections between BEAC and regional financial institutions.
- Developed a strong understanding of high-availability and security requirements within critical infrastructure.

## EDUCATION

• **ESGITECH (Tunis, Tunisia) | Sept 2024 – July 2026**

**Master's Degree in Cybersecurity | Honors: Highest Distinction**

Major: Information Systems Security, Cryptography, Risk Management.

• **BFAST (Bangui, Central African Republic) | Jan 2021 – Oct 2023**

**Bachelor's Degree in Teleinformatics | Honors: Distinction**

Major: Teleinformatics (Networking & Telecommunications).

• **Mbaïki High School (Central African Republic) | Sept 2019 – Sept 2020**

**High School Diploma / Baccalaureate in Science (Track D)**

## CERTIFICATIONS

**Building LLM Applications with Prompt Engineering | NVIDIA | April 2026**

ID: v4rq1bLWQO-q2Ymc5WeYfw

**DFIR Foundations and Techniques Course Professional Skills and Readiness | Blue Cape Security | August 2026 | ID: 11082026**

**Introduction to Cybersecurity | Cisco Network Academy | Jan 2025**

## SKILLS

• **Cybersecurity & SOC :**

SIEM (Wazuh), SOC, Incident Response, Digital Forensics, Log Analysis, Anomaly Detection, AI & Cybersecurity, Machine Learning.

• **Networks & Telecom :**

TCP/IP, DNS, DHCP, VPN, VLAN, Routing, Network Administration, Fiber Optics.

• **Systems:**

Windows Server, Ubuntu Server, Linux.

• **Virtualization & Infrastructure :**

VMware, VirtualBox, Docker.

• **Programming :**

Python, HTML.

• **Soft Skills :**

Adaptability, Rigor & Attention to Detail, Analytical Mindset, Autonomy, Technical Curiosity, Teamwork, Problem-Solving.

## LANGUAGES

- French: Native
- English: Intermediate

## HOBBIES

- Basketball
- Reading

## KEY PROJECTS & ACHIEVEMENTS

- Designed and deployed a cyber threat detection and response platform based on Wazuh SIEM, OpenSearch, Threat Intelligence, and Artificial Intelligence.
- Built a cybersecurity lab simulating an enterprise environment with Active Directory, Windows Server, Windows, and Linux.
- Developed an automated SOC agent combining event collection, AI analysis, Threat Intelligence, and automated response.
- Integrated VirusTotal, AbuseIPDB, and AlienVault OTX to automatically enrich security logs.
- Implemented Active Response mechanisms to automatically block malicious IP addresses.
- Automated SOC report generation and incident tracking workflows.
- Conducted a deployment study for a fiber optic network utilizing FTTH technology.
